

ARCHITECTURAL STANDARDS POLICY FOR **THE HEIGHTS**
COMMUNITY OF THE STEDWICK HOMES CORPORATION

***Any exterior modification including those listed below requires prior approval by the
Montgomery Village Foundation Architectural Review Board.***

To ensure values and enhance the appearance of Montgomery Village, the following criteria are established to serve as a general guide for residents of **The Heights** desiring to make exterior alterations or changes to their property. ***All modifications must be completed within three months of board approval unless a specific exception is received.***

The purpose of the MVF Architectural Review Board is to maintain the original architectural design and integrity of each community in Montgomery Village. All requests for exterior modifications, house additions, replacement materials or other structures are reviewed by the ARB on an individual basis utilizing guidelines based on the original design intent and overall aesthetics. Original design features must be retained unless otherwise approved by the ARB. The ARB acknowledges building materials are constantly changing and will allow new materials wherever they may be appropriately integrated within the original architectural plan of the community.

1. **Roof** – Any change in color or style from original requires prior approval.
2. **Exterior Paint** - Recorded exterior house colors for each individual home are available at the Montgomery Village Foundation office. No approval is required if the exterior paint colors are not changed from these recorded colors.
3. **Siding/Trim** – Any change in color, style or material requires prior approval.
4. **Replacement Front Doors** – All replacement doors must receive prior approval. The color of the front door must be house trim or siding color. Wood stained front doors will be considered on an individual basis.
Front Entrance Sidelights – All replacement front entrance sidelights must receive prior approval. All sidelight replacements will be reviewed on an individual basis.
**** Guidelines have been established for replacement doors and are available upon request at the Foundation office.***
5. **Replacement Windows** – Must be bronze (dark brown) sliders. Other colors will be reviewed on an individual basis.
Storm Windows - Must be bronze (dark brown) sliders. Other color selections will be reviewed on an individual basis.
6. **Garage Door** – Replacement garage doors require prior approval. The color of the garage door must be either the house trim or siding color.

7. **Storm/Screen Doors** – Front entrance storm/screen door will be reviewed on an individual basis (see attached drawing for recommended styles). The color of the door must be the color of the front door. Side or rear storm/screen doors must be painted the house trim color. *White storm doors will not be approved.*
Security Storm Door – These doors must be painted the front entry door color.
8. **Security Lighting** - Must conform to MVF approved guidelines. *Original light fixtures on front elevations must be retained (may include motion sensor lights).*
9. **Elevated Deck** – To be reviewed on an individual basis.
Ground Level Deck –To be screened with shrubs to enclose that portion between deck and grade that is greater than 12” in height.
Deck Color – Any tinted stain or colored preservatives to be reviewed on an individual basis.
10. **Fence** – To be 3 rail, split-rail wood, 48” in height and natural in color. Galvanized welded wire mesh with 2" x 4" openings may be stapled to the inside of the fence. Black or dark green vinyl coated wire mesh is also acceptable (see drawing). Split-rail fencing must be installed on property lines.
Gate – To be split-rail design or alternate arched top design (see drawing).
Privacy Fencing - Closed fence for screening purposes to be 6 feet in height, solid board design and must not exceed 25 linear feet in total length. Color to be natural.
11. **Storage Sheds** – Will be approved in accordance with attached Shed Guidelines (see attachment).
12. **Mailboxes** – Optional mailbox with newspaper box must follow attached design (see drawing). Alternate colors for the mailbox and post will be determined on an individual basis.
13. **House Numbers** – Only black or brass metal numbers no higher than 5” will be permitted. The original design and location must be retained unless otherwise approved.
14. **Basketball Backboards** – To be considered on an individual basis.
15. **Composting** - Residential composting of yard waste will be permitted according to approved guidelines. Contact MVF for these specific guidelines.

Additional guidelines for exterior modifications are available at the MVF office.

ARCHITECTURAL STANDARDS DEPARTMENT

VILLAGE-WIDE SHED GUIDELINES

Wood or Pre-fabricated

These new guidelines may replace existing shed criterion for some homes corporations or it may serve only as an addendum to existing criteria. Because of the individuality of each community, sheds have to be reviewed on an individual basis. For the most part, these guidelines will be used as a Village-wide reference for staff, homeowners, for the Architectural Review Board, and the MVF Board of Directors.

1. Requisite: Only one shed per property will be approved.
2. Design and materials -
 - The roof style may be either gabled-framed or shed-framed (slanted). The roof material will be considered on an individual basis. The recommended roof material is either natural, unstained cedar wood shakes, or asphalt shingles in a color approved by the ARB.
 - Barn style roofs or other styles will not be approved.
 - Only one window is typically approved for a shed. Two windows may be considered on an individual basis.
 - Typically only one doorway is approved for a shed. Double doorways will be considered on an individual basis.
 - Although, originally, sheds were approved to be wood – Texture T-1-11 or grooved cedar – alternate shed materials will now be considered on an individual basis.
 - No shutters or window boxes will be approved for any shed.
3. Color –
 - If sheds are adjacent to the house, sheds are typically approved to be the color of the house siding or trim. The roof color is typically approved to be the same as the house. The siding and trim could be the same color.
 - If sheds are to be located in the rear yard, one solid, neutral color is preferred. All colors will be reviewed on an individual basis.
4. Location –
 - The location of the shed will be determined on an individual basis taking into account the lot configuration, lot size, relationship to the adjoining yard, and existing house and yard structures.

- Sheds to be located under elevated decks or in recessed areas of the house will have more flexibility as far as style and materials. Each application will be considered on an individual basis.

5. Size –

- **Single Family, Detached Home Communities:**
The recommended maximum width and length is 8'W x 10'L with a maximum height of 9' to the peak. Larger sheds will be considered on an individual basis.
- **Townhouse/ Zero-Lot-Line Communities with split-rail fences:**
The maximum width and length is 6'W x 8'L with a maximum height of 8' to the peak. Larger heights will be considered on an individual basis based on yard size.
- **Townhouse Communities with yard enclosure fences:**
The maximum width and length is 4'W x 8'L with the shed height not to exceed the fence height. Higher roof peaks will be considered on an individual basis.

These guidelines would not apply to communities which have a specific shed criterion (sheds constructed in conjunction with fences, etc.) or where sheds are prohibited.

Sheds prohibited in:

Dockside
Gablefield
Meadowgate
Highland Hall
Fairway Islands

Sheds prohibited if not built according to plan:

Millrace
