

ARCHITECTURAL STANDARDS POLICY FOR THE MEWS COMMUNITY
OF THE EASTGATE HOMES CORPORATION

Any exterior modification including those listed below requires prior approval by the Montgomery Village Foundation Architectural Review Board.

Purpose: To ensure values and enhance the appearance of Montgomery Village, the following criteria are established to serve as a general guide for residents of **The Mews** desiring to make exterior alterations or changes to their property. ***All modifications must be completed within three months of board approval unless a specific exception is received.***

The goal of the MVF Architectural Review Board is to maintain the original architectural design and integrity of each community in Montgomery Village. All requests for exterior modifications, house additions, replacement materials or other structures are reviewed by the ARB on an individual basis utilizing guidelines based on the original design intent and overall aesthetics. Original design features must be retained unless otherwise approved by the ARB. The ARB acknowledges building materials are constantly changing and will approve new materials wherever they may be appropriately integrated within the original architectural plan of the community.

1. **Roof** - Any change in color or style from original requires prior approval.
2. **Exterior Paint** - Recorded exterior house colors for each individual home are available at the Montgomery Village Foundation office. No approval is required if the exterior paint colors are not changed from these recorded colors. Exterior color change requests for house siding, trim, shutters, front door, storm door, garage door or garage trim are reviewed by the ARB on an individual basis and must be compatible with the style and design of each specific community. The Architectural Standards staff is available to assist homeowners in their color selection.
3. **Siding/Trim/Shutters** – Any change in color, style or material requires prior approval.
4. **Replacement Windows** – to be double-hung style with grids to match original grid pattern and the color to be considered on an individual basis.
Storm Windows - to be white or painted the color of the window trim.
5. **Storm/Screen Doors** – Front entrance storm/screen door styles will be reviewed on an individual basis (see attached drawing for recommended styles). Storm doors must be the color of the front door. ***White storm doors will not be approved.***
Security Storm Door – Must be painted the front door color.

6. **Security Lighting** – must conform to MVF approved guidelines. *Original light fixtures on front elevations must be retained (may or may not include motion sensor lights).*
7. **Elevated Decks** - must be built in accordance with standard option rear deck plan. No other deck plan will be considered (see drawings).
Ground Level Deck – shall be reviewed on an individual basis.
Deck Color – Any tinted stains or color preservatives will be reviewed on an individual basis.
8. **Fence** - to be 6' high, 1" x 4" alternating (board on board) style, pressure-treated lumber and natural in color (see drawing). No fences will be permitted in the front yard of the townhouse.
Gate –to be solid board style with arch (see drawing).
9. **Storage Sheds** – Will be approved in accordance with attached Shed Guidelines. (See attachment.
10. **House Numbers** – Only black or brass metal numbers no higher than 5" will be permitted. The original design and location must be retained unless otherwise approved.
11. **Basketball Backboards** - will not be permitted.
12. **Composting** - Residential composting of yard waste will be permitted according to approved guidelines. Contact MVF for these specific guidelines.

Additional guidelines for exterior modifications are available at the MVF office.

ARCHITECTURAL STANDARDS DEPARTMENT

VILLAGE-WIDE SHED GUIDELINES

Wood or Pre-fabricated

These new guidelines may replace existing shed criterion for some homes corporations or it may serve only as an addendum to existing criteria. Because of the individuality of each community, sheds have to be reviewed on an individual basis. For the most part, these guidelines will be used as a Village-wide reference for staff, homeowners, for the Architectural Review Board, and the MVF Board of Directors.

1. Requisite: Only one shed per property will be approved.
2. Design and materials -
 - The roof style may be either gabled-framed or shed-framed (slanted). The roof material will be considered on an individual basis. The recommended roof material is either natural, unstained cedar wood shakes, or asphalt shingles in a color approved by the ARB.
 - Barn style roofs or other styles will not be approved.
 - Only one window is typically approved for a shed. Two windows may be considered on an individual basis.
 - Typically only one doorway is approved for a shed. Double doorways will be considered on an individual basis.
 - Although, originally, sheds were approved to be wood – Texture T-1-11 or grooved cedar – alternate shed materials will now be considered on an individual basis.
 - No shutters or window boxes will be approved for any shed.
3. Color –
 - If sheds are adjacent to the house, sheds are typically approved to be the color of the house siding or trim. The roof color is typically approved to be the same as the house. The siding and trim could be the same color.
 - If sheds are to be located in the rear yard, one solid, neutral color is preferred. All colors will be reviewed on an individual basis.
4. Location –
 - The location of the shed will be determined on an individual basis taking into account the lot configuration, lot size, relationship to the adjoining yard, and existing house and yard structures.

- Sheds to be located under elevated decks or in recessed areas of the house will have more flexibility as far as style and materials. Each application will be considered on an individual basis.

5. Size –

- **Single Family, Detached Home Communities:**
The recommended maximum width and length is 8'W x 10'L with a maximum height of 9' to the peak. Larger sheds will be considered on an individual basis.
- **Townhouse/ Zero-Lot-Line Communities with split-rail fences:**
The maximum width and length is 6'W x 8'L with a maximum height of 8' to the peak. Larger heights will be considered on an individual basis based on yard size.
- **Townhouse Communities with yard enclosure fences:**
The maximum width and length is 4'W x 8'L with the shed height not to exceed the fence height. Higher roof peaks will be considered on an individual basis.

These guidelines would not apply to communities which have a specific shed criterion (sheds constructed in conjunction with fences, etc.) or where sheds are prohibited.

Sheds prohibited in:

Dockside
Gablefield
Meadowgate
Highland Hall
Fairway Islands

Sheds prohibited if not built according to plan:

Millrace
